

HNE CLUB MEETING

LIPID OXIDATION: NEW BIOCHEMICAL INSIGHTS AND CLINICAL APPLICATIONS

GENOA (Italy)

October 10-12, 2024

Since its founding on September 28, 2000, the HNE Club has been successful in holding regular biennial meetings until 2018. The planned edition of 2020 was canceled due to the Covid pandemic, and in 2023 the Club held a session at the annual meeting of the Society for Free Radical Research-Europe in Vienna.

We are now proud to organize the next HNE Club Meeting in Genoa, Italy, with the goal of providing scientists working in the field of lipid oxidation the best place where they can present and discuss their latest findings.

Slots are available for lectures and oral communications, with priority given to young researchers. Presentations will be selected from submitted abstracts (submission deadline: April 30, 2024).

The Meeting intends to honor the long-lasting and fruitful scientific career of Umberto Marinari, Professor Emeritus of General Pathology at the University of Genoa.

No registration fee will be applied.

Send your abstract (max 250 words) to giuseppe.poli@unito.it
